CONTENTS

1. Electrochemistry: A technique to form, to modify and to characterize organic conducting polymers 1

   J. SIMONET and J. RAULT-BERTHELOT

2. The electronic structure of solids studied using angle resolved photoemission spectroscopy 49

   K. E. SMITH and S. D. KEVAN

3. Insertion compounds of transition-metal and uranium oxides 133

   ANN M. CHIPPINDALE, P. G. DICKENS and A. V. POWELL

4. Hard amorphous (diamond-like) carbons 199

   J. ROBERTSON
